**New solution,  
Reduction in cost,  
Improvement in quality &  
Enhancement in performance.**

#### ABSTRACT

Previous assessment method for Learning Outcome (LO) of Computer Aided Design (CAD) software in “Engineering Drawing and CAD” course is in the form of hardcopy test papers with a standard quality and quite costly which can cause ineffective attainment. Thus, there are no opportunities for the learners and examiners to answer and evaluate respectively the paperless answer scripts, and to know the test results quickly. Therefore, the purpose of **i-Test CAD** is to improve the test assessment method for LO of CAD software by an alternative through eLearn@USM. On top of that, **i-Test CAD** is introduced in order to encourage paperless and sustainable environment.

#### OBJECTIVES

Since the previous assessment method for LO of CAD software in “Engineering Drawing and CAD” course is no longer adequate in the era of Industrial Revolution (IR) 4.0, thus **i-Test CAD** is designed by using e-learning to attain these three objectives:

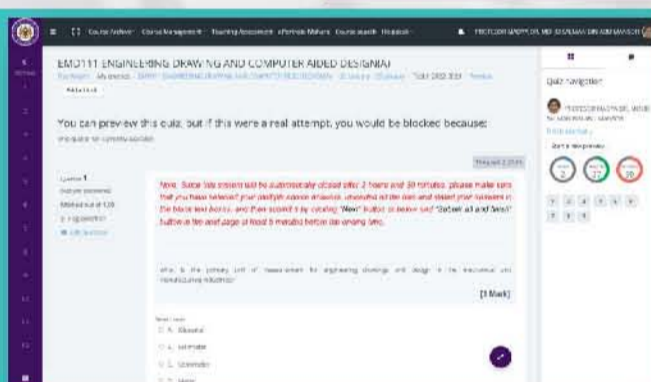

- To provide a platform where the paperless test question and answer scripts can be employed.
- To obtain the test results quickly based on constructive alignment.
- To encourage paperless test for sustainable environment in IR 4.0.

#### ADDED VALUES

1. Paperless test question and answer

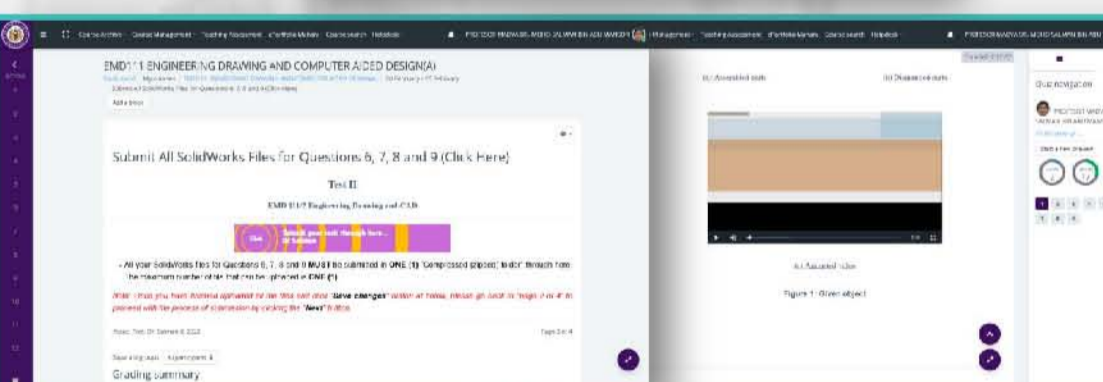

- Multiple c**H**oice
- Alternative Learning Domain: C/P

- E**M**bedded answers
- Alternative Learning Domain: C/P

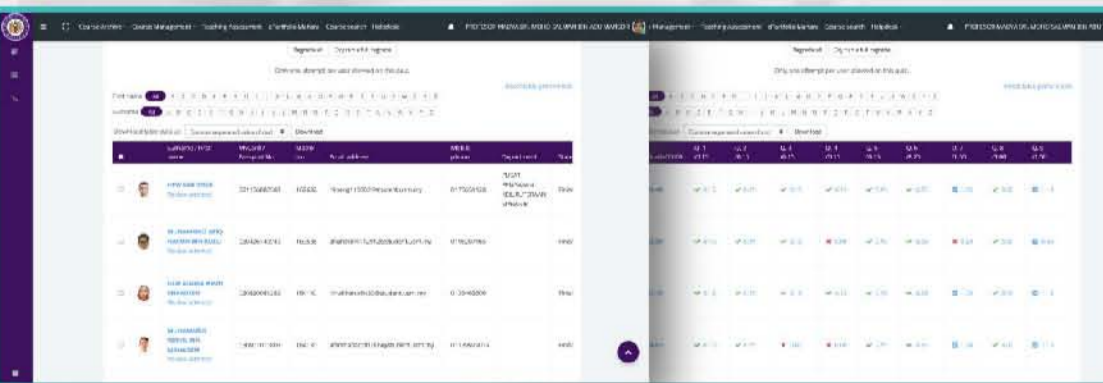

- Files **B**ased evaluation + Animation
- Alternative Learning Domain: C/P

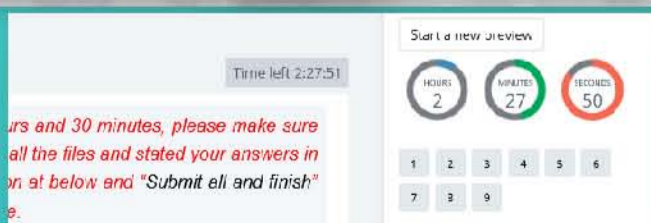

2. Quick test results

- Marks for **A**ll questions
- Alternative Learning Domain: C/A

- PLUS: **T**imer Countdown
- Alternative Learning Domain: C/A

NOTE: C=Cognitive P=Psychomotor A=Affective

#### USEFULNESS

- 1 Evaluate learners' initial performance quickly based on rubric
- 2 Grab more the learners' attention via online test assessment
- 3 Encourage learners to work in sustainable environment

#### COMMERCIALIZATION POTENTIAL

- 1 Flexible Education
- 2 Higher Learning Institutions
- 3 Training Centres
- 4 Manufacturing Industries

#### ACKNOWLEDGEMENT

School of Mechanical Engineering, Centre for Development of Academic Excellence (CDAE) and Universiti Sains Malaysia

#### INNOVATOR DETAILS

**Associate Professor Dr. Mohd Salman Abu Mansor**  
School of Mechanical Engineering,  
Engineering Campus, Universiti Sains Malaysia,  
14300 Nibong Tebal, Pulau Pinang, Malaysia  
Tel: +6 04 599 6308 | E-mail: mesalman@usm.my
